NOTICIAS DE LOS GUERREROS

Escuelas del Condado de
Okeechobee

1 de Diciembre, 2014

Los miembros de FFA de OMS FFA asistieron a un almuerzo en Farm City Luncheon el 20 de Noviembre, 2014.

Cambios en los Horizontes de OMS!

Este año ha comenzado con un aluvión de cambios de personal (como no hemos visto en años anteriores). Actualmente tenemos tres vacantes de maestros, y tenemos varios aplicantes que terminarán esta semana sus clases de la universidad. Con el fin de aprovechar al máximo el talento y el personal altamente calificado que tenemos en la escuela, hay dos maestras que van a enseñar en otros grados, y anticipamos que tres maestros nuevos se unirán a nuestro personal este nuevo semestre. Los padres y estudiantes que van a ser afectados por estos cambios, estarán recibiendo una carta de notificación al final de esta semana. Si usted tiene alguna pregunta/inquietud, por favor llámeme al (863) 462-5070. ¡Muchas gracias por su apoyo!

Scientists are testing 1000 people to determine whether each person has a certain gene.

A *false positive* is a result where the person tests positive, T , but does not have the gene, N . The probability of a false positive rate is $P(T|N)$.

The Venn diagram shows the number of people in the trial who tested positive and the number of people who have the gene.

Drag a number to each box to complete the two-way table.

Then drag a number to each box of the fraction to show the probability of a false positive.

James "Jim" Bridger
1804-1881

1 James Felix "Jim" Bridger's life story is as interesting as the tall tales he used to tell. Bridger was born in Virginia in 1804. Later, his family moved to a farm near St. Louis, Missouri. At age fourteen, he went to work as a blacksmith's apprentice. He learned how to make horseshoes and other products out of iron.

2 When Bridger was eighteen years old, he was the youngest member of a group that explored and mapped the Missouri River. As a part of the expedition, he was one of the first European American people to see the natural wonders of what is now Yellowstone National Park.

Why does the author use the word "peetrified" instead of "petrified" in this sentence?

"He would tell stories of glass mountains, "peetrified" birds singing "peetrified" songs, and talk about the days when Pike's Peak was just a hole in the ground." (Paragraph 6)

Why sit in the cafeteria when your parents drop you off early?
